

## Progress Ranch Treatment Services for Children

Year Founded: 1976  
 Website: [www.progressranch.com](http://www.progressranch.com)  
 Financial information  
 21/21 Revenues: \$2,160,614.42  
 21/22 Expenses: \$2,157,801.46  
 Assets: \$877,567.44  
 # Served 2021/22: 23 families

Left: Children prepare an after-school snack with certified counselors. Right: Plans for a welcoming, fully functional kitchen space.

### MISSION

To inspire hope and healing by empowering families; serving with integrity; and celebrating diversity, resiliency, and community.

### PROGRAMS

Progress Ranch changes the lives of children who would otherwise be institutionalized with little hope of living in a family.

Most of our children are in foster care and many come to us from psychiatric hospitals. We commit to these incredibly vulnerable and challenging children so they can thrive in families.

Our trained professionals provide 24/7 intensive and mental health treatment for children who have experienced severe trauma.

Annually, we provide more than:

- 500 hours of individual and family therapy
- 1,300 hours of individual and group therapeutic activities (additional to therapy), such as life skills (cooking, hygiene); coping skills (mindfulness, communication); and social skills (teamwork, community participation, fun!).
- 1,300 hours of case management and support preparing families to receive our children.
- 24/7 crisis support.

### Project Request

The saying, “the kitchen is the heart of a home,” is also true in the homes where we raise children at Progress Ranch. Children prepare meals with Youth Counselors (one of their favorite life skills activities) and spend time together around the countertop sharing snacks and chatting. The kitchen is a central place where children build authentic connections and practice the skills they will use when they live with a family.

Our kitchen is worn out from years of use by hundreds of children and Counselors. Funding from 100 Women of Yolo County would replace countertops beyond repair, install cupboards that close properly, and update damaged flooring. This is a project with lasting impact that will create a more welcoming “heart” for our home and benefit many, many children for years to come!
